

Remarks

Entry of the above amendments is respectfully requested.

The Reference to Related Applications section has been amended in order to correct some informalities. In particular, the status for Patent Application Serial No. 09/887,574 has been added, and the filing date for U.S. Provisional Application No. 60/017,133 has been changed from "May 19, 1996" to "May 17, 1996." Moreover, to further improve the form of the reference to the section, "U.S. Provisional Application Serial No." has been added in front of selected provisional applications. The title for U.S. Patent No. 5,857,983 has been added, and the application number for the application entitled "Disposable Element for Use in a Body Fluid Sampling Device" has been added. It is submitted that these amendments are editorial in nature, and therefore, no new matter has been added.

As a housekeeping matter, it should be noted that the Declaration submitted from the parent application lists the serial numbers for three applications that were converted from utility applications to provisional applications. A chart provided below summarizes the changes in serial number when the applications were converted.

<u>Previous Utility Serial No.</u>		<u>Current Provisional Serial No.</u>
Application Serial No. 08/714,548	→	Provisional Serial No. 60/092,121
Application Serial No. 08/710,456	→	Provisional Serial No. 60/064,856
Application Serial No. 08/727,074	→	Provisional Serial No. 60/044,406

Copies of the Decision on Petitions that were issued to convert these three applications to provisional applications have been enclosed for the Examiner's convenience. It should be noted that with respect to U.S. Provisional Application Serial No. 60/092,121, filed September 16, 1996, it is believed that there was a typographical error in the Decision on Petition. Specifically, the application number

was listed as “09/714,548”, when it is believed that it should have been listed as “08/714,548.” As should be appreciated from reviewing § 503 of the M.P.E.P., applications filed in 1996 should have a “08” series code, rather than a “09” series code. Based on the above discussion, it is submitted that the Declaration submitted with the present application correctly identifies the original serial numbers from which a benefit of priority is claimed. Consequently, a new Declaration does not have to be submitted in order to perfect the claim of priority. Please note that a Request for Corrected Filing Receipt has been submitted with this Preliminary Amendment so that these three applications can be added to the claim of domestic priority.

If the Examiner should have any comments or suggestions to help speed the prosecution of this application, the Examiner is requested to contact the Applicant’s undersigned representative by telephone.

Respectfully Submitted,

By
